

MIHIR BORSANIYA

Full Stack ERP Engineer & Multi-Tenant SaaS Architect

Gujarat, India | developermihir13@gmail.com | +91 75758 96243 | github.com/Mihir0903 | linkedin.com/in/mihirborsaniya

PROFESSIONAL SUMMARY

Full Stack ERP Engineer with 3+ years of experience designing and building enterprise-grade, multi-tenant SaaS platforms. Specialized in production-grade backend architectures, payment infrastructure, and end-to-end DevOps ownership. Architected and shipped AksharPOS ERP — a multi-tenant retail/POS platform with 50+ database models and 10+ integrated business modules running in production.

EXPERIENCE

Full Stack ERP Engineer — AksharPOS ERP Platform

2024 – Present

- Architected multi-tenant SaaS infrastructure with per-tenant database isolation and dynamic, LRU-cached connection routing.
- Designed subscription-based feature gating and automated tenant onboarding (DB provisioning + seed data) in under 30 seconds.
- Owned production deployment on Linux VPS: NGINX reverse proxy, PM2 cluster mode, SSL, and GitHub Actions CI/CD pipelines.

ERP & POS Software Engineer

2023 – 2024

- Built POS billing, inventory, purchase, sales, customer, supplier, branch, and loyalty modules from scratch.
- Integrated Razorpay payments with HMAC webhook verification, idempotency handling, and daily reconciliation reports.
- Modeled 50+ normalized MySQL tables with transaction management for complex business workflows.

Full Stack Developer

2022 – 2023

- Developed REST APIs with Node.js & Express, secured with JWT authentication and role-based access control (RBAC).
- Built responsive React.js frontends with Redux Toolkit and React Query against a MySQL + Sequelize backend.

FLAGSHIP PROJECT — AKSHARPOS ERP

Enterprise Multi-Tenant ERP Platform for retail, wholesale, and POS businesses. 10+ integrated modules: POS Billing, Inventory, Purchase, Sales, Customer & Supplier Management, Loyalty, Branch Management, Payments, and Reporting & Analytics. Multi-tenant architecture with tenant isolation, dynamic DB connections, 50+ models, JWT + RBAC security, and live production deployments.

TECHNICAL SKILLS

Backend	Node.js, Express.js, REST APIs, JWT, RBAC, Middleware Architecture, Transactions, System Design
Frontend	React.js, Next.js, TypeScript, JavaScript, Redux Toolkit, React Query, Tailwind CSS
Database	MySQL, Sequelize ORM, Data Modeling, Query Optimization, Normalization, Multi-Tenant DBs
Payments	Razorpay, UPI, Card Payments, Webhook Verification, Reconciliation, Idempotency
DevOps	Linux/Ubuntu, NGINX, PM2, GitHub Actions, CI/CD, SSL, VPS Hosting, Production Deployment
Architecture	Multi-Tenant SaaS, Tenant Isolation, Dynamic DB Routing, LRU Caching, Scalability
Version Control	Git, GitHub, Pull Requests, Branch Strategy, Code Reviews

KEY ENGINEERING HIGHLIGHTS

- Zero cross-tenant data leakage with ~40ms tenant-resolution overhead via cached Sequelize connection pooling.
- Reduced deployment time from 30 minutes (manual) to ~4 minutes (automated) with zero-downtime PM2 graceful reloads.
- Cryptographically verified all payment webhooks before any DB write; zero reconciliation issues in production.
